

TS-x73A Series

AMD Ryzen V1500B 4C/8T 2.2 GHz 2.5GbE NAS
 supports M.2 NVMe SSD and dual PCIe for 10GbE

QTS / QuTS hero

NAS for professionals and SMBs.

The new TS-x73A AMD Ryzen 4/6/8-bay desktop NAS

- 2020/06 Launched the industry-first **AMD V1500B Ryzen 8/12/16-bay TS-x73AU** rackmount NAS series.
- 2020/11 Launched the **9-bay TS-h973AX** desktop NAS.
- 2021/02 Introducing the same powerful V1500B into **4-bay TS-473A, 6-bay TS-673A and 8-bay TS-873A** desktop NAS.

**Kensington
security slot**

2 x M.2 NVMe PCIe SSD slots supporting SSD cache or Qtier auto tiering

2 x M.2 2280 PCIe Gen3 x1 NVMe SSD slots for SSD cache or Qtier auto tiering performance enhancement.

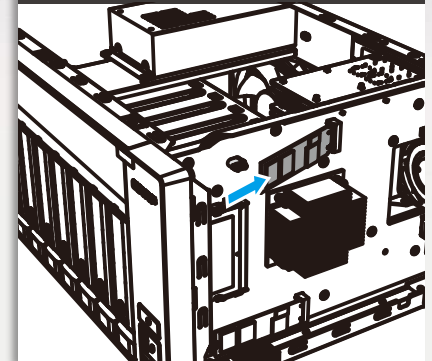

- **Improve random data access speeds with an SSD cache**
SSD caches accelerate IOPS performance and reduce latency for storage volumes. They are perfect for IOPS-demanding applications (including databases and virtualization) and can significantly improve overall workflows.
- **Maximize the value of SSDs with Qtier Technology**
Qtier™ Technology empowers TS-x73A with auto tiering that helps continuously optimize storage efficiency by automatically moving data between M.2 SSDs, 2.5-inch SSDs, and high-capacity HDDs based on the data's access frequency. Qtier™ 2.0 features IO-awareness that empowers SSD-tiered storage with a cache-like reserved space to handle burst I/O in real time, greatly maximizing the advantages of SSDs.

Note: Qtier is only supported in the QTS OS, not in the QuTS hero OS.

1. Remove screws and cover

2. Install M.2 NVMe SSD

3. Tool-less installation

M.2 NVMe SSD and Qtier auto-tiering for speed and capacity

Qtier engine

- Automatically moves data between different tiers
- SSD tier capacity is not limited by RAM size

01

Before tiering

Frequently accessed data is not optimized.

02

Start tiering

03

After tiering

Data is optimized

04

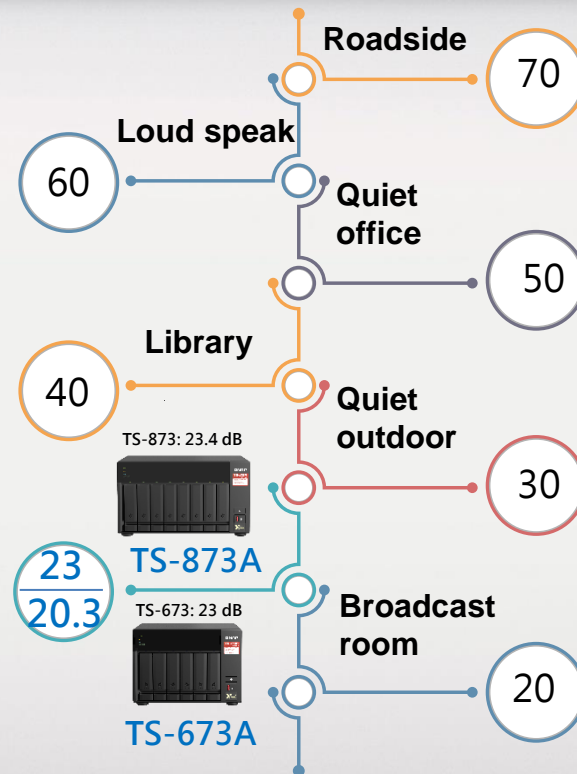

Changes in data access pattern

Note: Qtier is only supported in the QTS OS, not in the QuTS hero OS.

Compartmentalized smart cooling

Enhanced design over the previous generation to separately detects the CPU and hard drive temperatures for dynamically adjusting separate fan speeds for an quieter operations in the office.

Sound pressure (dB)

Noise Test : Sound pressure is measured at the front bystander position with low fan speed.

Large pre-installed 8GB DDR4 RAM, upgradeable to max 64GB and also optional ECC RAM support

NAS Model Numbers:

TS-473A-8G

8 GB RAM (1 x 8 GB)

TS-673A-8G

8 GB RAM (1 x 8 GB)

TS-873A-8G

8 GB RAM (1 x 8 GB)

- 2 x DDR4 SO-DIMM RAM slots for a max of 64 GB (2 x 32 GB), dual-channel design and optional ECC RAM support.
- QNAP 8/16/32 GB RAM modules for easy upgrade and better multi-app or multi-user usage.

Note: Do not install ECC and Non-ECC RAM on the same NAS at the same time.

1. Remove the cover

2. Remove the old RAM (optional)

3. Install the new RAM

Built-in 2 x 2.5 GbE LAN ports, aggregated for maximum 5Gbps bandwidth

2.5GbE-supported motherboards, Wi-Fi 6 AP, switches, and LAN cards are now becoming popular

2.5GbE benefits

2.5X the speed

2.5GbE

1GbE → 2.5GbE

Use the same Cat.5e/
Cat.6/ Cat. 6A
LAN cables

2 x 2.5GbE LAN ports
(also 1GbE/100M)

2 x PCIe slots for network, storage, and more

2 x PCIe Gen3 x4 expansion slots for various QNAP
PCIe cards for more value-added applications.

2 x PCIe Gen3 x4

QXG 10GbE/5GbE/2.5GbE
network expansion cards

QM2 M.2 SSD cards

QXP SAS, SATA, USB
expansion cards

QXP Wi-Fi 6 & FC cards

QWA-AC2600 Wi-Fi AP card
Wi-Fi 5 2.4GHz/5GHz wireless AP

QM2 cards add support for SSD caching and 10GbE connectivity

- QM2 M.2 SSD PCIe cards allow adding 2 or 4 M.2 NVMe / SATA SSDs to TS-x73A. Enable SSD caching or create RAID 5 group with the two on-board M.2 NVMe SSDs using Qtier.
- Maximize the storage capacity and performance without occupying any 3.5" drive bays. Some QM2 models even combine M.2 SSD and 10GBASE-T connectivity into one solution.

Active cooling module

Thermal sensors allow real-time temperature monitoring and adjust fan rotation speed

Compatible with standard PCIe slots

Low-profile PCIe card including full-height bracket

HybridMount provides two modes for file-based cloud storage gateway

	Network Drive Mount	File Cloud Gateway 
Setup Method	Mount cloud drives and file servers	Select "File Cloud Gateway" mode and create a dedicated cache space
Connections	No limit	2 free and perpetual connections. Purchase license for more connections
Access Performance	Depends on network speed	High performance thanks to caching
Access in File Station	Supported	Supported
Access through SMB / NFS / AFP	Not supported	Supported
Sync with the cloud	Sync only when browsing	Sync constantly for quick access
Integration with QTS apps	Not supported	Supported 

- Online collaboration
- File data analysis

HybridMount - Cascade share the access permission to remote devices

The remote data mounted by SMB/NFS can be shared with other devices with folder permission to achieve a cascade share architecture.

- To avoid local users accessing the remote data by VPN and to reduce the security concern and risk of VPN.
- No longer need to manage user accounts in the remote server. The local admin retains full control over assigning different permissions to local users.

Hyper Data Protector : All-in-one active backup solution for virtual machines

- Supports VMware and Microsoft Hyper-V
- Unlimited VM backups and license-free
- Active backup solution
- Restore at any time point
- Constant monitoring

Boxafe: Comprehensive Backup Solution for Google Workspace and Microsoft 365

- Keep important data in your hands
- Move older data out of the cloud to reduce cost

Google™ Workspace

Gmail

Backup all your emails and attachments in Gmail

Google Drive

Backup all your file versions in Google Drive and supports My Drive and Shared Drive

Contacts

Backup all your contacts in Google Contacts

Calendar

Backup all your events and attachments in Google Calendar

Microsoft 365®

Outlook

Backup all your emails and attachments in Outlook

Contacts (People)

Backup all your contacts in Outlook People

Calendar

Backup all your events and attachments in Outlook Calendar

OneDrive

Backup all your files in OneDrive and support SharePoint

QmailAgent – email backup solution

Best Email Retention Solution

- Collectively manage and back up your personal and business emails.
- Easily auto back up all your emails and attachments.
- Quickly search and gain access to specific messages.
- Back up emails for disaster recovery.
- Encryption service protects backed up private emails.

Install an NVIDIA graphics card to add HDMI output and improve VM / container performance

Support graphic cards that do not need power cables, including **NVIDIA® GTX 1650, 1050, or 1030** to add an HDMI output and boost performance of GPU-accelerated computing, virtual machines, and containers via GPU passthrough.

Note:

1. Supported video formats depend on the hardware and software specifications of the devices. Playback capability and quality may vary due to factors including the original file formats/quality, hardware and software limitations, and output devices.
2. When Virtualization Station uses graphics cards, the NAS will temporarily stop hardware transcoding acceleration for QTS (and vice versa).
3. Consult the [Compatibility List](#) for information on supported NAS and graphics cards.

**Virtualization
Station**

**Container
Station**

**Ubuntu Linux
Station**

All-in-one server to host virtual machines and containers

Virtualization Station

Supports to run the Virtual machine such as Windows, Linux[®], UNIX[®] and Android.

Container Station

QNAP's Container Station exclusively integrates LXC and Docker lightweight virtualization technologies, allowing you to download apps from the built-in Docker Hub Registry.

Establish and run dual systems - Ubuntu & QuTS hero

Ubuntu Linux Station

- Run QuTS hero and Ubuntu dual system, dual system application to enjoy.
- One-click installation of multiple versions Ubuntu: 16.04 / 18.04 / 20.04
- Ubuntu Software Center enjoy a variety of application downloads
- Remotely access the Ubuntu Linux desktop through a browser /
- Install a PCIe graphic card to add an HDMI output screen, and use a USB keyboard and mouse with it.

You Tube

Smart and automatic file management

Qsirch 5

A powerful, Google™-like search tool

- Search image, music, video, document, and email by keyword and filters.
- 5 advanced image search: search by face, text in image, things, color and map.
- Supports Qfiling to perform archival tasks based on your search criteria.

Qfiling 3

Automatically filing and archiving

- 2 type of task: filing task, recycling task
- 3 type of scheduling rule: one-time, scheduling, real-time
- 9 editing module: AI face blur, encryption and decryption, video transcoding and so on

Notification Center - diversity of active notification

QuLog Center proactively analyze and monitor connections

● Proactive analysis

- List the top 5 Applications for Error/Warning Logs
- System access statistics such as connection types and logged in IP

● Quick filtering

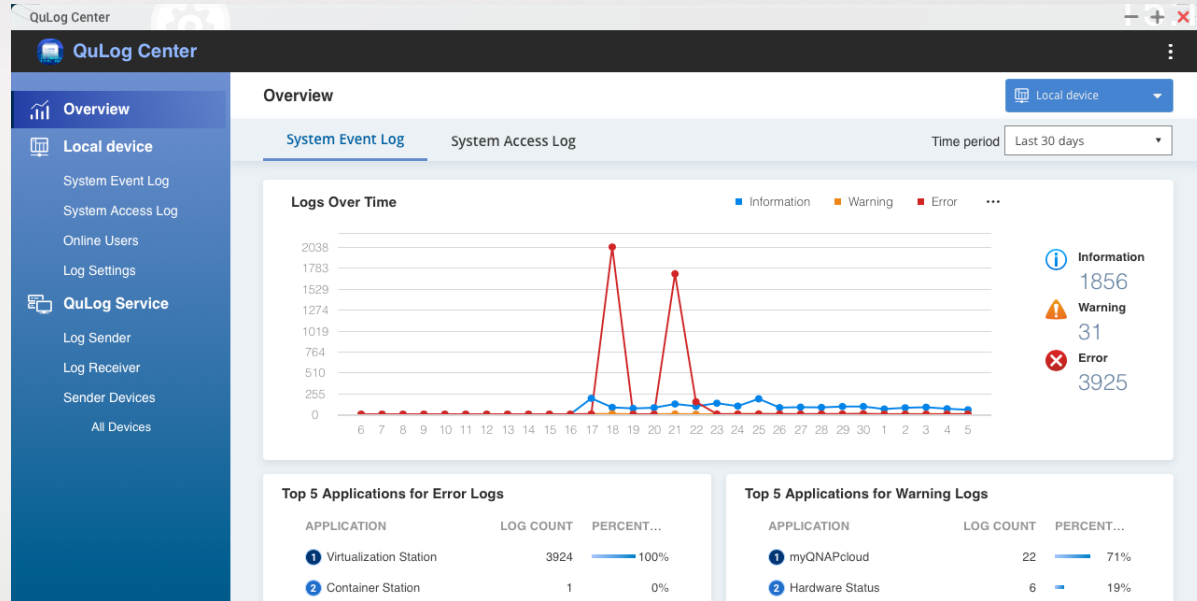

- Categorize by APP name or date
- Customize labels/styles/flags for advanced search

● Real-time monitoring

- View the online members and their connection types

● Unified management

- Consolidate detailed local and remote NAS record files
- Set the size of the space for the record
- Send NAS log files to a standard Syslog server
- Notify specified notifications by Notification Center

Brand new surveillance app QVR Elite

Channel License Type Unlimited

QVR Elite is subscription-based, with monthly, yearly, and 3-year subscription plans. You can build a robust surveillance system with a low-cost monthly price of US \$1.99 per channel. You can alter the subscription based on your needs to reach higher cost efficiency.

QVR Pro Client

- Supported by the QVR Pro Client same as QVR Pro's client
- Same features include Dynamic View Layout, Live and Playback at the same time, and e-map event display

Performance Evolution

- At initial version, max recording channel is 128 channels, the next version we will increase it to 192 channels.

Standard MP4 file

- Supported by both QuTS hero and QTS
- Record standard MP4 format, allowing for smooth playback on all devices

High-performance multimedia streaming platform

**QuMagie AI smart photo albums
and auto classification**

Plex Server media streaming

**CAYIN MediaSign Player
HEVC (H.265) video transcoding**

**Use Cinema28 for
multi-room streaming**

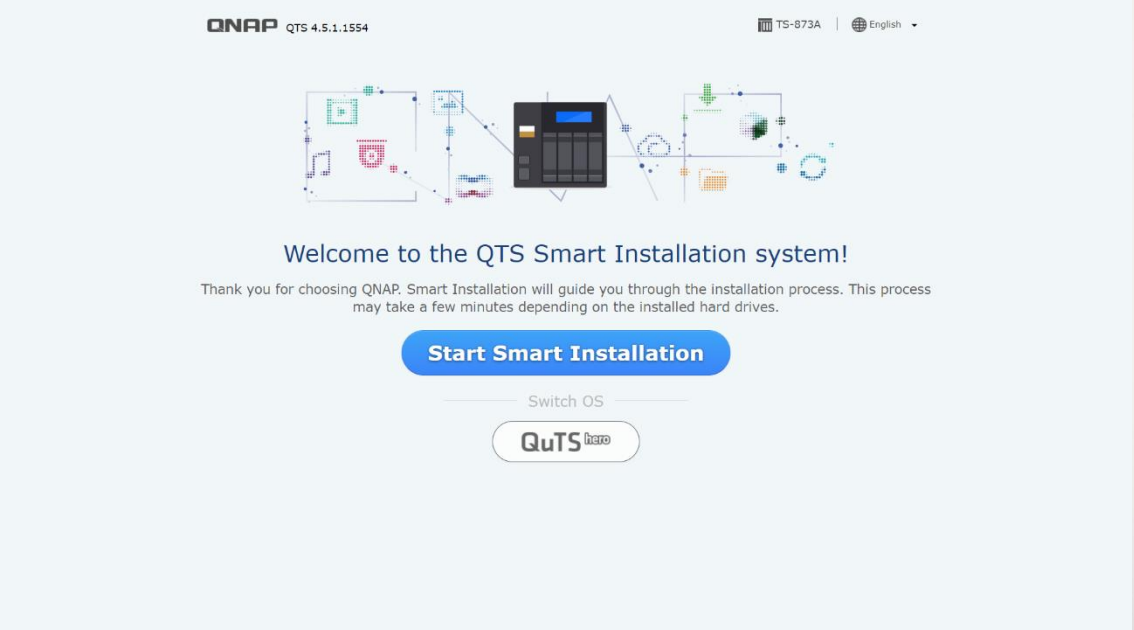

With QTS / QuTS hero two systems, depending on your preference

The QTS operating system is preloaded. Businesses can switch to ZFS-based QuTS hero operating system with greater reliability based on the needs of different applications at any time.

Attention :

1. Since QTS and QuTS hero use different file systems, users must not insert the old hard disks between different operating systems to avoid data loss.
2. When using QuTS hero, we recommend to use SSD as your system drives to gain better performance.
 - a. Hot swap drives by installing 2.5" SATA SSD in two 3.5" drive bays
 - b. M.2 NVMe SSD slots on motherboard do not support hot-swapping

QNAP QTS 4.5.1.1554 TS-873A English

Welcome to the QTS Smart Installation system!

Thank you for choosing QNAP. Smart Installation will guide you through the installation process. This process may take a few minutes depending on the installed hard drives.
