**12 Stream AX WiFi—4X Better Performance**

Twelve WiFi spatial streams - four in the 2.4GHz band, and eight in the 5GHz band offer four times the device capacity as compared to typical 2x2 AC WiFi. AX WiFi also supports sending up to eight multi-user MIMO transmissions at a time, up from four for AC WiFi. This results in a significantly improved network capacity and benefits the performance of all legacy devices.

**8 High-Performance Antennas**

Eight high-performance antennas extend wireless range indoors and out. Router signals are amplified to maximize reach and reliability, letting you use your WiFi in more places. Get stronger WiFi signals throughout your home, whether you're gaming in the basement or need that extra coverage for your outdoor security cameras.

**64bit 2.2GHz Quad-Core Processor**

Ultra-fast processor for smoother 4K UHD streaming, online/VR gaming, and a stronger, more reliable WiFi experience. This powerful processor is optimized for AX ensuring speed and performance for even more smart home devices and high-speed applications.

**New Multi-Gigabit Wired Speeds**

The multi-gigabit Ethernet port gives you 5 times faster speeds than the wired speed of a typical Gigabit port over Cat 5 cables. Use the four gigabit Ethernet LAN ports to connect more wired devices for faster file transfer and uninterrupted connections. Combine two gigabit Ethernet ports to further improve the aggregated file transfer speed.

### Orthogonal Frequency Division Multiple Access (OFDMA)

Using the OFDMA feature of AX WiFi, the WiFi traffic is managed much more efficiently since data is transmitted from different devices concurrently, rather than having each device's data wait for its turn. This results in an efficient use of air-time, reduced latency, and increased bandwidth to add more devices to your network.

### Ultra-Powerful AX-Optimized Quad-Core Processor

Nighthawk AX12, powered by a 64bit 2.2GHz quad-core processor, is built for performance at an ultimate level. The ultra-fast processor enables the router to seamlessly handle data intensive applications such as 4K/8K UHD video streaming, VR/AR gaming, as well as provide a stronger, more reliable WiFi experience. This powerful processor is optimized for AX making intelligent spontaneous decisions to schedule data traffic to maximize WiFi Bandwidth utilization.
